

Different heat exchanger solutions are needed in a variety of processes of the food industry.

We offer heat exchangers specially for this industry:

Components: Tube heat exchangers

- [C-Tube \(coiled tube heat exchanger\)](#) : Condensation of flash steam, system separation, hot water preparation
- [M-Tube \(tube-in-tube twisted tube heat exchanger\)](#) : strongly soiled process waste water with a high solid fraction, heat recovery
- [P-Tube \(tube bundle heat exchanger\)](#) : Exhaust, preheating of feed water
- [X-Tube Boxer \(self-cleaning gas/water heat exchanger\)](#) : Exhaust air with severe deposits (fouling)

Components: Plate-type heat exchanger

- [B-Plate \(brazed plate-type heat exchanger\)](#) : Tempering, preheating, hot water preparation, system separation
- [G-Plate \(sealed plate-type heat exchanger\)](#) : Production process, cooling tower water, tempering, preheating, heat recovery
- [V-Plate \(air/air crossflow plate-type heat exchanger\)](#) : Heat recovery from drying processes, heating, cooling and air-conditioning, air humidification, process waste air

Besides, we also provide individual solutions to every customer's needs. In addition to the sale of components, we are also specialists in the installation of complete heat recovery systems on turn-key basis.
