The paper industry is one of the most critical areas in which heat exchangers are used.

We offer heat exchangers specially for this industry:

Components: Tube heat exchangers

- C-Tube (coiled tube heat exchanger) : Steam systems, system separation, hot water preparation, condensation, oil cooling, oil preheating, heat recovery

- M-Tube (tube-in-tube twisted tube heat exchanger) : Process waste water
- P-Tube (tube bundle heat exchanger) : Steam systems, system separation, hot water preparation, condensation, oil cooling, oil preheating, heat recovery

- X-Tube Boxer (self-cleaning gas/water heat exchanger) : Exhaust air with severe deposits (fouling)

Components: Plate-type heat exchanger

- B-Plate (brazed plate-type heat exchanger) : Engine water, oil cooling, tempering, preheating, hot water preparation, system separation

- G-Plate (sealed plate-type heat exchanger) : Cooling tower water, oil cooling, tempering, preheating, heat recovery, engine water, degreasing, product baths, hydraulic systems, oil, rolling oil
- V-Plate (air/air crossflow plate-type heat exchanger) : Heat recovery from drying processes, heating, cooling and air-conditioning, air humidification, process waste air

Systems: customized

- UHS tempering system : Mobile or stationary systems for heating engine water, engine oil or charge air, etc.

Besides, we also provide individual solutions to every customer's needs. In addition to the sale of components, we are also specialists in the installation of complete heat recovery systems on turn-key basis.
